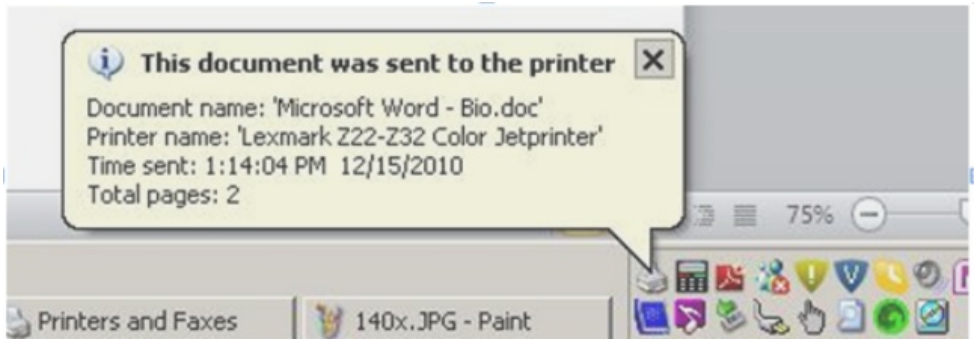
ISSUE:

I would like to get a notification when my workstation PDFeXPLODE printer processes the Print output and sends it to the server for processing. How can I do this?

This is what I would like to appear in the system tray.



ANSWER:

Follow these step by step instructions. You can either remove or update Printer notifications using these instructions.

1. Go to **Start > Control Panel > Hardware and Sound** and select " **View devices and Printers** " with a left mouse click.

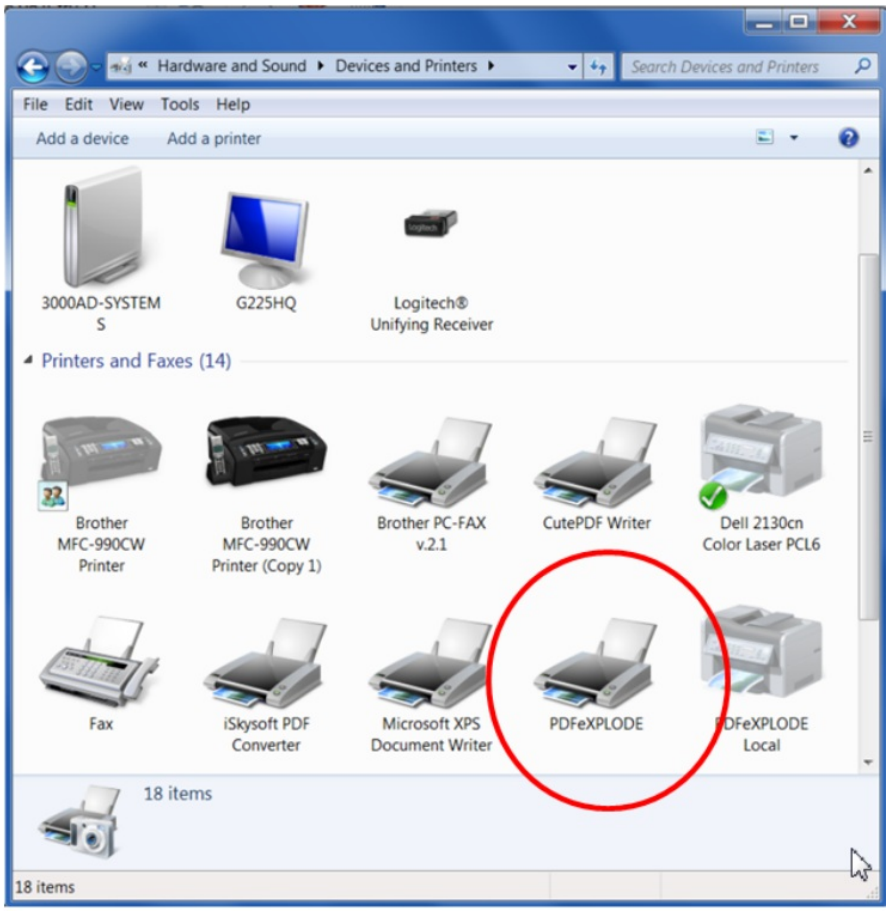
2. **Devices and Printers** Panel displays (Windows 7).



3. Left click (once) on PDFeXPLODE printer (or any printer of your choice) The **Print server properties** option will display on the toolbar below the “File Edit View…” menu

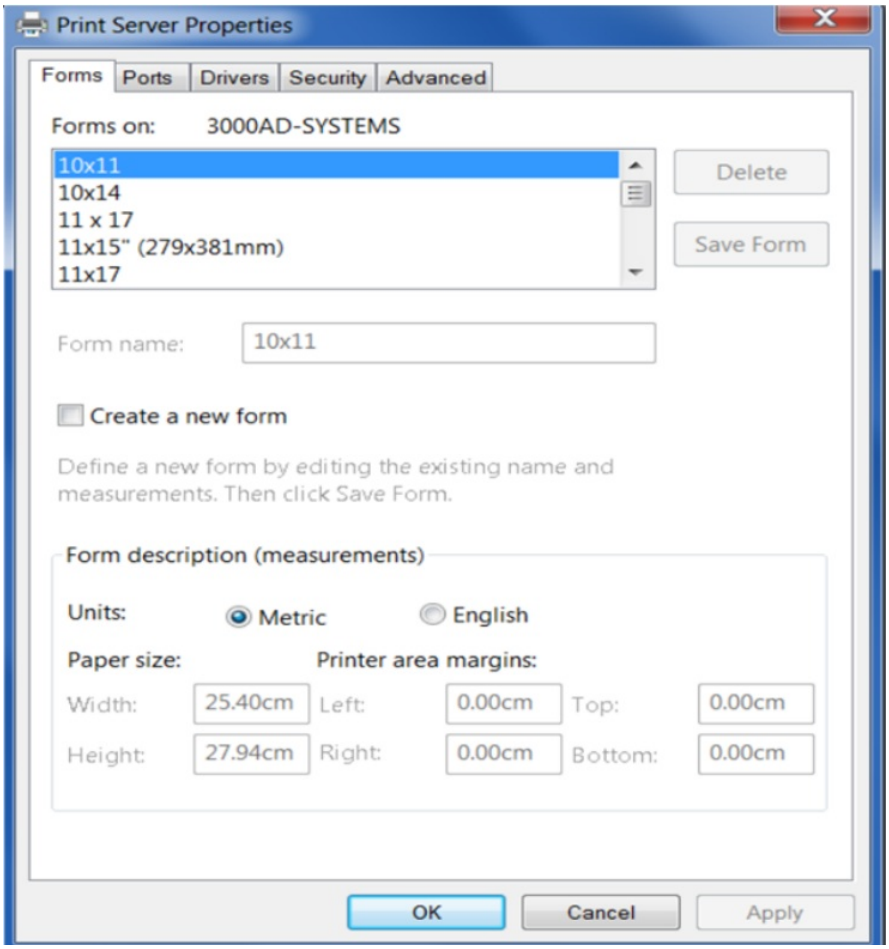
4. **Left click** on the " **Print server properties** " option in the menu bar **that appears** at the top. This will open and display a Printer properties screen



5. Now click on the ‘Advanced’ tab to open the screen **. Then check both boxes as indicated** to implement 'Printer notifications' or **uncheck both boxes** to remove 'Printer notifications'.

6. **Click APPLY** to make changes and then click **OK to exit** and save your selection
